

The “Top 25” exported goods to Non-European countries

The export list to non-European countries is not much different than the one to European countries. Automobiles and steel play the most prominent parts once again. One exception is that pharmaceutical products do not make the “**Top 25**” list, which they did in the two tables above.

Top export goods to Non-EU countries		
1	Chassis, bodies, engines, car parts and accessories for motor vehicles	467.604.416
2	Machinery	311.200.625
